Although not officially supported, they may work well on your computer Mac OS (UNIX-based) and Linux are completely different story compared to Windows.

hp pavilion laptop drivers windows 7

As you may know, drivers are essential for the proper working of hardware devices.. IT_WinSec wrote: The only officially supported operating system for your particular machine is Windows (vendor-Microsoft).

hp pavilion gaming laptop drivers

Additionally, they have their own EULA However, some Linux distributions can be installed and used.. If you decide to try - do not forget to create a back-up of all your important files - on external media/device.. • Windows Server 2008, 2008 R2, 2012, 2012 R2, and 2016 Mac OS is custom OS - made by Apple and tailored for their own hardware, their own devices.. If you decide to try - do not forget to create a back-up of all your important files - on external media/device.. Thank you so much indeed, Do you know which editions of Linux can be installed, and worked well on my HP laptop? Also, I think that when I install a fresh installation of Linux OS, then I'll need to install the drives and application of my devices(such, as Bluetooth, Graphics adapters, Biometric devices, and so on. e10c415e6f
